wine a social and cultural history of the drink that changed our lives is a wine history with a difference most histories of wine like hugh johnson's the story of wine paul lukacs's inventing wine and rod phillips's own a short history of wine are chronological narratives that begin with wine in the ancient world and run through to modern times wine has been seen typically as the subject of broader historical trends and events how for example economic and diplomatic conditions favoured or interrupted the wine trade and how changes in taste affected wine styles wine departs from these approaches by organizing chapters by theme and by focusing much more on how wine has been positively and actively implicated in broad historical changes it looks at the way wine has been used to demarcate social groups and genders how wine has shaped facets of social life as diverse as medicine religion and military activity how vineyards and wine cultures have transformed landscapes and how successive innovations in wine packaging from amphoras to barrels to bottles have affected and been affected by commerce and consumption wine neither sees the history of wine as the passive result of historical forces nor sees wine as a prime agent of historical change rather it views wine as a critical actor in key trends in the histories of society culture and the environment each chapter takes a single theme and the material within each is organized chronologically the book is formed of chapters that together provide a compact and theme specific history of wine in its own right enabling readers to consume chapters as self-contained units rather than as parts of a longer narrative whole this is an ideal reference resource for wine lovers and historians alike

written by the world's bestselling wine author this new illustrated edition is an enthralling read tracing the story of wine from the dawn of civilization through the bacchanalian splendor of the ancient world to the present day updated to include the latest developments in wine this edition features never before seen archival photographs

whites and reds a history of wine in the lands of tsar and commissar tells the story of russia's encounter with viticulture and winemaking rooted in the early seventeenth century embraced by peter the great and then magnified many times over by the annexation of the indigenous wine economies and cultures of georgia crimea and moldova in the late eighteenth and early nineteenth centuries viticulture and winemaking became

an important indicator of Russia's place at the European table while the Russian Revolution in 1917 left many of the empire's vineyards and wineries in ruins it did not alter the political and cultural meanings attached to wine. Stalin himself embraced champagne as part of the good life of socialism and the Soviet Union became a winemaking superpower in its own right trailing only Spain, Italy, and France in the volume of its production. Whites and reds illuminate the ideas, controversies, political alliances, technologies, business practices, international networks, and of course the growers, vintners, connoisseurs, and consumers who shaped the history of wine in the Russian Empire and the Soviet Union over more than two centuries because wine was domesticated by virtue of imperialism its history reveals many of the instabilities and peculiarities of the Russian and Soviet Empires over two centuries the production and consumption patterns of peripheral territories near the Black Sea and in the Caucasus became a hallmark of Russian and Soviet civilizational identity and cultural refinement wine in Russia was always more than something to drink.

Having been a teetotaler for more than thirty years the author's personal habits, associations, and sympathies have all been in favor of the unfermented theory but the facts encountered in the present investigation have constrained him reluctantly to conclude that so far as the wines of the ancients are concerned unfermented wine is a myth.
